# Introduction

## Farm to School

Farm to school encompasses a variety of efforts to connect communities and students to fresh, nutritious food in order to encourage healthy eating habits and strengthen local economies. Farm to school generally includes three core elements: (1) school gardens; (2) nutrition, agriculture, health, and food education; and (3) the procurement of local foods for school meals. The first and second elements aim to help students become “citizen eaters” who understand the connections between food, health, and agriculture. The third aims to create pathways to deliver local produce directly into school food programs, such as the USDA Fresh Fruit and Vegetable Program.

## FFVP Program Overview

The USDA Fresh Fruit and Vegetable Program (FFVP) provides federal funds to low-income elementary schools to serve fresh fruits and vegetables as snacks between meals during the school day. The goal of the FFVP is to improve children’s overall diet and promote healthy eating habits. Schools in Hawai‘i can order any *fresh* fruit or vegetable for the FFVP. The FFVP encourages schools to serve a variety of produce in order to introduce students to fruits and vegetables that are generally not included in the school lunch menu. FFVP snacks are served *between meals* to the entire elementary student body at participating schools. Snacks are served to students either whole (such as grapes or a tangerine), or pre-cut (such as broccoli florets). Schools generally serve FFVP snacks raw, although schools can offer lightly cooked vegetables once a week. Some schools order whole produce and prepare the snacks on-site. Other schools buy their FFVP snacks pre-processed. Serving sizes vary from school to school.

## Buying Local – Why it Matters

Farmers throughout Hawai‘i are eager to supply local produce to local schools, either directly or through local food hubs and distributors. Buying fresh, local food can have a positive impact on the economy, public health, and education. Serving fresher, more nutritious food in school meals is associated with improved academic performance, reduced consumption of unhealthy foods, a stronger connection to the source of our food, and increased knowledge of agriculture. Connecting children to the source of their food can encourage healthier food choices that support learning and academic achievement. Farm to school can also benefit farmers by providing a new market for crops. It can increase the demand for local food and drive increases in local food production, thereby enhancing Hawai‘i’s food security and keeping more dollars circulating within the local economy. Ultimately, farm to school is about building strong local communities in the areas of health, education, and the local economy.

# For Schools

## How to Buy Local for the FFVP

1. **Get to know what's in season.** Although Hawai'i has a 12-month growing cycle, various crops have different peak seasons. Get to know what's in season by reviewing the *Hawai'i Seasonality Guide* for local fruits and vegetables on page 4 of this Guide. Local food hubs and distributors can also tell you what's in season.
2. **Request local.** Let your food vendors know that local food is important to your school by requesting local produce when you procure local food. If you plan your FFVP menu in advance, include local produce and take into account seasonality as you create your schedule.
3. **Meet your local farmers.** Build relationships with local farmers and engage students in local agriculture by organizing field trips to local farms, visiting local farmers markets, and inviting farmers to speak to students.
  - a. **Buying directly from farmers.** Hawai'i charter schools can buy directly from farmers. We recommend that charter schools work with Hawai'i Child Nutrition Programs to ensure that their schools' procurement procedures comply with the law.
  - b. **Buying from vendors.** If you buy fresh produce through a vendor, tell the farmers you meet which vendors you use, and tell your vendors about the farmers from whom you want to buy.

For a list of **Hawai'i Produce Farms**, see page 6. For a list of **Hawai'i Produce Food Hubs and Distributors**, see page 23.

4. **Review the USDA's *Procuring Local Foods for Child Nutrition Programs Guide***, available at [http://www.fns.usda.gov/sites/default/files/f2s/F2S\\_Procuring\\_Local\\_Foods\\_Child\\_Nutrition\\_Prog\\_Guide.pdf](http://www.fns.usda.gov/sites/default/files/f2s/F2S_Procuring_Local_Foods_Child_Nutrition_Prog_Guide.pdf).

## Hawai‘i Seasonality Guide - Peak Availability of Local Crops during School Year

The following table provides a list of crops at peak availability during the months of the school year.

Hawai‘i Seasonality Guide - Peak Availability of Local Crops During School Year				
August	September	October	November	December
Banana	Banana	Atemoya	Atemoya	Atemoya
Cantaloupe	Honeydew	Banana	Avocado	Avocado
Honeydew	Lime	Lime	Lime	Lime
Lime	Longan	Longan	Mango	Orange
Longan	Lychee	Mango	Orange	Rambutan
Lychee	Mango	Orange	Papaya	Tangerine
Mango	Orange	Papaya	Rambutan	Burdock
Papaya	Papaya	Persimmon	Tangerine	Cabbage, Asian
Pineapple	Persimmon	Rambutan	Burdock	Corn, Sweet
Watermelon	Pineapple	Burdock	Cabbage, Chinese	Heart of Palm
Beans	Watermelon	Cabbage, Chinese	Cabbage, Asian	Lettuce, Baby Greens
Burdock	Burdock	Cabbage, Asian	Corn, Sweet	Mushrooms
Cabbage, Chinese	Cabbage, Chinese	Daikon	Heart of Palm	Pumpkin
Cabbage, Asian	Cabbage, Asian	Heart of Palm	Lettuce, Baby Greens	Sprouts
Celery	Daikon	Lettuce, Baby Greens	Mushrooms	Taro
Cucumber	Heart of Palm	Mushrooms	Pumpkin	Zucchini
Daikon	Lettuce, Baby Greens	Pumpkin	Sprouts	
Ginger Root	Lettuce, Romaine	Sprouts	Taro	
Heart of Palm	Mushrooms	Zucchini	Zucchini

# *For Farmers*

## How to Sell to Schools in Hawai'i

There are three avenues for selling to schools in Hawai'i: (1) Selling directly to the Hawai'i Department of Education; (2) Selling directly to charter schools and independent schools; and (3) Selling to distributors that work with schools.

### 1. Selling Directly to the Hawai'i Department of Education

Hawai'i has only one school district, which includes all public schools under the Hawai'i Department of Education (HIDOE). HIDOE public schools purchase a variety of fresh produce for schools, including apples, baby carrots, bananas, broccoli, cabbage, celery, cucumber, green leaf lettuce, oranges, papaya, red cabbage, romaine lettuce, spinach, tomatoes, and won bok.

In order to sell directly to HIDOE public schools, farmers must both meet HIDOE's vendor qualifications and successfully respond to either an informal or a formal competitive solicitation by HIDOE. In an informal solicitation, HIDOE will seek bids from three vendors and, generally speaking, the lowest priced bid will prevail. In a formal solicitation, HIDOE publicly advertises the district's needs in the form of an invitation for bids or a request for proposals. Selling directly to a HIDOE school may be challenging for local farmers, as HIDOE's vendor qualifications for farmers include certification of Good Agricultural Practices, a \$1 million liability insurance policy, and tax clearance from Hawai'i Compliance Express (<https://vendors.ehawaii.gov>).

### 2. Selling Directly to Charter Schools and Independent Schools

Selling directly to charter schools and independent schools may be more feasible for local farmers because the food procurement systems at these schools are generally less complex. Selling directly to a charter school or an independent school requires building a relationship with the school food manager, learning about the school's menu cycle, and understanding the school's buying procedures and requirements. These schools may be interested in formally or informally contracting with local growers. For a list of charter schools in Hawai'i, see the State Public Charter School Commission's School Directory, available at <http://www.chartercommission.hawaii.gov/charter-school-directory>.

### 3. Selling to Produce Distributors

The least complex route for a farmer to feed local school children is by working with a produce distributor. Distributors provide schools with fresh produce for a number of programs that fund school food purchases, including the USDA National School Lunch Program, the USDA Fresh Fruit and Vegetable Program, and the Department of Defense (DoD) Fresh Fruit and Vegetable Program. Both charter schools and public schools in Hawai'i purchase fresh produce through distributors. Schools purchase from distributors for convenience and also because schools may lack kitchen facilities or staff to process/prepare food. Distributors also may be interested in formally or informally contracting with local growers. See page 23 for a list of Hawai'i Produce Distributors.

## Supplying for the USDA Fresh Fruit and Vegetable (Snack) Program

The FFVP is a good starting place for local farmers that are interested in selling to schools for several reasons: (1) the quantity requirements for the FFVP are lower than other school food programs and more attainable for local farms; (2) the FFVP has a more generous budget than other school food programs; and (3) the FFVP encourages schools to expose students to a variety of produce. Most FFVP schools (public and charter) place their FFVP orders through distributors. A number of local schools are interested in purchasing local fruits and vegetables for the FFVP. In general, regular public schools in Hawai'i place FFVP orders through produce distributors that are approved Hawai'i Department of Education vendors. Charter schools and independent schools can buy directly from farmers, but often purchase from distributors for convenience and also because schools may lack kitchen facilities or staff to process/prepare food.

### Hawai'i FFVP Schools

Each year schools in Hawai'i must apply to be a part of the FFVP. The number of schools participating from year to year can vary. The following schools signed up for the FFVP for the 2016-2017 school year. For the most recent list of schools, contact Hawai'i Child Nutrition Programs at 808-587-3600 or visit <http://hcnp.hawaii.gov/>.

### Fresh Produce Ordered for USDA Fresh Fruit & Vegetable Program (2014-2015)

During the 2014-2015 school year, FFVP schools in Hawai‘i ordered the following produce, among other items.

Fresh Produce List			
Apples	Clementines	Papaya	Sweet Potatoes
Asparagus	Kale	Peach	Tangelos
Avocado	Kiwi	Pears	Tangerines
Banana	Kumquat	Pineapple	Taro
Bell Peppers	Lettuce	Plum	Tomato
Blackberries	Liliko‘i	Pumpkin	‘Ulu
Blueberries	Longan	Rambutan	Watercress
Broccoli	Mango	Raspberries	Watermelon
Cantaloupe	Mushrooms	Spinach	Zucchini
Carrots	Nectarines	Starfruit	
Cauliflower	Okra	Strawberries	
Celery	Oranges	String Beans	

### USDA Food Buying Guide for Child Nutrition Programs

The USDA Food Buying Guide for Child Nutrition Programs is a manual to help schools order the right amount of food. To assist farmers with estimating amounts required to supply FFVP schools, the table below includes the USDA Food Buying Guide for Produce and the estimated number of pounds required to supply the FFVP statewide and by island. The estimates assume that FFVP snacks are ¼ cup or one whole small fruit (such as a tangerine) and that each school offers the same fruit/vegetable a maximum of three times during the school year. **Please note that FFVP schools may choose to order more than a ¼ cup per serving and may offer the same fruit/vegetable more than three times during the school year. To figure out the demand for a particular crop, it is best to call the specific schools you are interested in supplying or call a produce wholesaler that supplies schools.**

The USDA Food Buying Guide for Produce is available at [http://www.fns.usda.gov/sites/default/files/FBG\\_Section\\_2-VegFruits\\_2.pdf](http://www.fns.usda.gov/sites/default/files/FBG_Section_2-VegFruits_2.pdf)

## USDA FRESH FRUIT AND VEGETABLE PROGRAM

The **USDA Fresh Fruit and Vegetable Program** (FFVP) provides federal funds to low-income elementary schools to serve fresh fruits and vegetables as snacks between meals during the school day. The goal of the FFVP is to improve children's overall diet and promote healthy eating habits. **Hawaii Child Nutrition Programs** administers the FFVP in Hawai'i.

### Implementing the FFVP in Hawai'i

Implementing the FFVP in Hawai'i presents both unique opportunities and challenges. We surveyed FFVP schools in Hawai'i to learn about opportunities, challenges, and best practices for a successful program. Read our complete report: ***Implementing the USDA Fresh Fruit and Vegetable Program in Hawai'i***.

## Buying and Selling Local for the FFVP

**Schools** in Hawai'i can order any fresh fruit or vegetable for the FFVP. So why not multiply the benefit of the program by buying local? Contrary to popular belief, local fruits and vegetables are not always more expensive, and the benefits are numerous!

### *Buying Local: Why It Matters*

- Produce that is harvested and eaten close to peak ripeness has better flavor and lots of nutrients, when handled properly.
- Connecting children to the source of their food can encourage healthier food choices that bolster learning and academic achievement.
- Buying local builds stronger local economies by keep more dollars circulating within communities.
- Supporting local farmers can enhance Hawai'i's food security by driving demand for local food and increases in local food production.

### *Know What's In Season*

Farmers throughout Hawai'i grow a wide variety of fruits and vegetables during Hawai'i's twelve-month growing season. Local fruits include pineapple, papaya, banana, starfruit, dragon fruit, oranges, mango, liliko'i, watermelon, rambutan, avocado, and more! Local vegetables include a variety of lettuces and tomatoes, as well as taro, sweet potato, breadfruit, kale, watercress, broccoli, okra, bell peppers, cucumbers, among many others.

There's no shortage of options, but seasonality matters. Certain fruits and vegetables only grow during certain times of the year. View the [\*\*Hawai'i Seasonality Chart\*\*](#) to learn which fruits and vegetables are in season throughout the year.

### *Request Local*

Let your vendors know that buying local matters to your school. Ask what's in season and request produce from local farmers. For a list of farms that are interested in supplying produce for the FFVP, see The Kohala Center's [\*\*FFVP Hawai'i Local Produce Buying Guide\*\*](#).

**Hawai'i Produce Farmers**, your produce is in demand! Schools throughout the Hawaiian Islands want to buy your produce for the FFVP and other child nutrition programs. Farmers can sell directly to private schools and charter schools, but generally have to go through a produce distributor to sell to regular DOE public schools. Contact schools to find out which distributors they use, and then contact those distributors to

inquire about selling your produce for the FFVP and other child nutrition programs.

For a list of **produce distributors** on each Hawaiian Island, see our **[FFVP Hawai'i Local Produce Buying Guide](#)**. For a list of **charter schools** in Hawai'i, see the **[State Public Charter School Commission's School Directory](#)**.

## FFVP Hawai'i Local Produce Buying Guide

We created the **[FFVP Hawai'i Local Produce Buying Guide](#)** to provide schools and farmers with more information on buying and selling local produce for the FFVP. The Guide includes:

- ***For Schools:*** A Hawai'i produce seasonality guide; tips on buying local; and a list of local farms on each island that are interesting in selling local produce for the FFVP and other child nutrition programs.
- ***For Farmers:*** A list of FFVP schools in Hawai'i; estimates of demand by type of produce for FFVP schools on each island; contact information for produce vendors that supply FFVP schools in Hawai'i; and information on the **[USDA Food Buying Guide for Produce](#)** to help farmers and distributors calculate volume requirements based on serving sizes.

## FFVP Schools in Hawai'i

Each year elementary schools in Hawai'i apply to participate in the FFVP. For the 2016–17 school year, the following schools signed up for the FFVP, with the number of elementary students enrolled in each school listed in parentheses. For the most recent list of schools, contact Hawai'i Child Nutrition Programs at 808-587-3600 or visit **[hcnp.hawaii.gov/overview/ffvp](http://hcnp.hawaii.gov/overview/ffvp)**.

# *Buying and Selling Local for the* **USDA Fresh Fruit and Vegetable Program**

**January 2017**

The USDA Fresh Fruit and Vegetable Program (FFVP) provides federal funds to low-income elementary schools to serve fresh fruits and vegetables as snacks between meals during the school day. The goal of the FFVP is to improve children's overall diet and promote healthy eating habits.

**THE KOHALA CENTER®**

*Support provided by the USDA and Hawaii Department of Agriculture*

**Schools in Hawai‘i** can order any fresh fruit or vegetable for the FFVP. So why not multiply the benefit of the program by buying local? Contrary to popular belief, local fruits and vegetables are not always more expensive, and the benefits are numerous!

### **Buying Local: Why It Matters**

- Produce that is harvested and eaten close to peak ripeness has better flavor and lots of nutrients, when handled properly.
- Connecting children to the source of their food can encourage healthier food choices that bolster learning and academic achievement.
- Buying local builds stronger local economies by keep more dollars circulating within communities.
- Supporting local farmers can enhance Hawai‘i’s food security by driving demand for local food and increases in local food production.

### **Know What’s In Season**

Farmers throughout Hawai‘i grow a wide variety of fruits and vegetables during Hawai‘i’s twelve-month growing season. Local fruits include pineapple, papaya, banana, starfruit, dragon fruit, oranges, mango, liliko‘i, watermelon, rambutan, avocado, and more! Local vegetables include a variety of lettuces and tomatoes, as well as taro, sweet potato, breadfruit, kale, watercress, broccoli, okra, bell peppers, cucumbers, among many others. There’s no shortage of options, but seasonality matters. To find out which fruits and vegetables are in season, please review The Kohala Center’s FFVP Hawai‘i Local Produce Buying Guide online at [koha.la/ffvpguide](http://koha.la/ffvpguide).

### **Request Local**

Let your vendors know that buying local matters to your school. Ask what’s in season and request produce from local farmers. For a list of farms that are interested in supplying produce for the FFVP, see The Kohala Center’s FFVP Hawai‘i Local Produce Buying Guide online at [koha.la/ffvpguide](http://koha.la/ffvpguide).

**Hawai'i Produce Farmers:** Your fresh produce is in demand! Schools throughout the Hawaiian Islands want to buy your produce for the FFVP and other child nutrition programs. Farmers can sell directly to private schools and charter schools, but generally have to go through a produce distributor to sell to regular DOE public schools. Contact schools to find out which distributors they use, and then contact those distributors to inquire about selling your produce for the FFVP and other child nutrition programs. For a list of produce distributors on each island, see The Kohala Center's FFVP Hawai'i Local Produce Buying Guide at [koha.la/ffvpguide](http://koha.la/ffvpguide). For a list of charter schools in Hawai'i, see the State Public Charter School Commission's School Directory, available at [chartercommission.hawaii.gov/charter-school-directory](http://chartercommission.hawaii.gov/charter-school-directory).

Each year elementary schools in Hawai'i apply to participate in the FFVP. For the 2016–17 school year, these elementary schools signed up for the program:

# INTRODUCTION

The USDA Fresh Fruit and Vegetable Program (FFVP) provides federal funds to low-income elementary schools to serve fresh fruits and vegetables as snacks between meals during the school day. The goal of the FFVP is to improve children's overall diet and create healthy eating habits.

The FFVP reached approximately 30,000 students in Hawai'i during the 2014–15 school year, and will reach about the same number of students during the 2015–16 school year. Hawai'i's 2015–16 FFVP budget is \$2,151,561, of which approximately \$1.8 million is available for produce purchases. Seventy-two schools in Hawai'i signed up to participate in the FFVP during the 2015–16 school year, including 26 on Hawai'i Island, five on Kaua'i, nine on Maui, two on Moloka'i, and 30 on O'ahu.

The FFVP holds great potential to inculcate healthy eating habits and introduce students to a diverse assortment of fruits and vegetables. FFVP menu and budget requirements are more flexible than the National School Lunch Program. This flexibility allows schools to purchase a wide variety of produce, including local fruits and vegetables.

Despite the benefits and availability of funding, many schools choose not to participate in the FFVP. To determine the implementation challenges facing FFVP schools and identify tips for successful implementation, The Kohala Center examined the following three data sets:

1. Responses to the 2012 statewide FFVP survey conducted by Hawai'i Child Nutrition Programs (HCNP). This data set revealed a “lack of produce choices” and “lack of staff to prepare the produce for consumption” as the two primary barriers to implementing the FFVP.
2. Responses to the 2013 statewide FFVP survey conducted by HCNP. This data set similarly revealed insufficient produce choices and insufficient staff as the top two implementation barriers, after furloughs. Furloughs, or Directed Leave Without Pay, was an isolated issue in the 2012–13 school year.
3. Responses to interviews with 18 FFVP schools on Maui and Hawai'i Island, conducted in 2015 by members of the Hawai'i Farm to School and School Garden Hui. This data set confirmed that insufficient staff is still the largest barrier facing schools. Three additional challenges arose in the 2015 interviews, including: (1) onerous paperwork requirements, (2) complex procurement processes, and (3) a desire for more local produce options.

This report examines three main aspects of implementing the FFVP—operations and administration, procurement, and nutrition education—and identifies common challenges and tips for successful implementation.

# OPERATIONS AND ADMINISTRATION

Operating and administering the FFVP includes filling out FFVP paperwork; ordering, receiving, and storing produce; washing, cutting, cooking, portioning, delivering, and serving produce; and kitchen cleanup.

Schools in Hawai‘i have consistently reported insufficient staff to prepare produce as the most significant FFVP implementation challenge. Specific staffing challenges include: (1) existing school staff lacking sufficient time for the FFVP; (2) schools lacking sufficient funds to hire FFVP staff; (3) schools having difficulty finding or keeping FFVP staff; and (4) staff requiring more training.

Most schools report serving an FFVP snack two days a week and that FFVP preparation takes 1–2 hours per serving day. Many schools hire help to prepare produce for the FFVP. Other schools use an available School Food Service Manager, office staff, teachers, or parent volunteers to assist with preparation.

In addition to staffing issues, schools reported a lack of equipment, tools, supplies, and space to prepare FFVP snacks. Using the cafeteria’s existing food service resources can be a cost-effective option, but availability can be an issue, especially if FFVP preparation occurs at the same time as lunch or breakfast preparation. Storage space is another issue. The only storage option for most schools is refrigerators that are already at or near capacity for other child nutrition programs, including breakfast and lunch programs.

A number of schools also indicated that there is “not enough time in the school day,” and “too much going on in schools” to implement the FFVP. Several schools reported that the program entails a large volume of paperwork, including annual applications, staff time and effort sheets, additional hours forms, budget authorizations, surveys, data tracking logs, reports, production sheets, distributor order forms, and invoice logs.

## Operations and Administration Tips

- Hiring part-time help to assist with preparation, serving, and cleanup is helpful when current staff members are at capacity. FFVP schools may spend a portion of their FFVP budget on salaries and fringe benefits for employees who wash and chop produce, prepare trays, distribute produce to classrooms, set up kiosks, restock vending machines, and clean up. There is no set limit, but a good rule of thumb is to limit salary and benefit costs to 20 percent of the FFVP budget.
- Purchase equipment, tools, and supplies specifically for the FFVP when necessary. FFVP schools may spend up to 10 percent of their FFVP budget for administrative expenses, including documented planning expenses, paperwork, equipment, and all other aspects of implementing the FFVP that are not related to the preparation and service of fruits and vegetables.
- Ordering pre-cut produce can reduce preparation time.
- Preparing pre-portioned containers for teachers to distribute to students can minimize serving time.
- Serving FFVP snacks at a centralized kiosk before or after recess can help streamline the serving process.
- If your school has a FoodCorps Service Member, ask the member to assist with the program.

# PROCUREMENT

The majority of schools in Hawai'i procure fresh produce for the FFVP through distributors and food hubs. On Hawai'i Island, some charter schools procure fresh produce directly from local farms.

A number of schools reported that the procurement process is complex, requiring schools to obtain multiple bids and place multiple orders throughout the year, with varying amounts of advance notice to vendors.

In 2012, 40 percent of respondents reported a lack of sufficient produce choices for the program. This number dropped to 14 percent in 2013. When asked to list implementation challenges in 2015, respondents on Maui and Hawai'i Island did not report insufficient produce choice. Nearly all of the 2015 respondents reported being extremely pleased that their students are exposed to new types of produce, and several noted the variety of fruits and vegetables offered under the program, including dragon fruit, rambutan, galia melon, persimmon, pineapple, and several varieties of mushroom. The data suggest that some schools may have access to a greater variety of produce choices than others, and that produce options may be increasing over time.

Many schools seek locally grown produce for the FFVP. All but one of the 2015 respondents reported that they request local produce for the FFVP. Of these schools, all but one reported that vendors are "receptive to [this] preference."

\*Adapted from *Procuring Local Foods for Child Nutrition Programs* (USDA)

## Procurement Tips

- At the beginning of the school year, create FFVP order specifications, including a list of desired produce and quality, quantity, and delivery terms.
- Support local agriculture through the FFVP. Federal law prohibits schools from using local as a product specification and excluding all non-locally grown agricultural products from procurement specifications. However, schools can let vendors know that purchasing from local sources is a priority. Schools can also incorporate allowable "buy local" terms into specifications, such as price preferences for local products, requesting specific local varieties, and including minimum freshness requirements (e.g., delivery within five days of harvest). For more detailed information on local food procurement, review the USDA's local food procurement guide, *Procuring Local Foods for Child Nutrition Programs*, available at [http://www.fns.usda.gov/sites/default/files/f2s/F2S\\_Procuring\\_Local\\_Foods\\_Child\\_Nutrition\\_Prog\\_Guide.pdf](http://www.fns.usda.gov/sites/default/files/f2s/F2S_Procuring_Local_Foods_Child_Nutrition_Prog_Guide.pdf).
- Determine whether FFVP orders fall under formal or informal procurement processes. Under formal procurement, schools must publicly post a solicitation for bids. Informal procurement allows schools to solicit bids directly from vendors without public advertising. If using informal procurement processes, send specifications to at least three local vendors for bids (see the Five Basic Steps of Informal Procurement, left). For assistance, contact Hawai'i Child Nutrition Programs (<http://hcnp.hawaii.gov>).
- Work with selected vendor to create weekly FFVP menus.
- Utilize produce from your school garden if there is a sufficient quantity of a single crop to serve an FFVP snack to all students, and if your school garden employs good food safety practices.

The University of Hawai'i at Mānoa College of Tropical Agriculture and Human Resources (CTAHR) has prepared a guidance document—*Student and Food Safety: Best Practices for Hawai'i School Gardens*—available at <http://www.ctahr.hawaii.edu/oc/freepubs/pdf/FST-45.pdf>. The USDA has also compiled a list of food safety resources, available at <http://www.fns.usda.gov/farmto-school/farm-school-resources#Food%20Safety>. CTAHR extension agents can provide additional food safety guidance.

# NUTRITION EDUCATION

The USDA emphasizes nutrition education as a key component of the FFVP's mission to introduce and reinforce good eating habits. Nearly all FFVP schools in Hawai'i report that they provide nutrition education as part of the FFVP. A majority of FFVP schools requested assistance with providing nutrition education.

Few schools reported using a standard nutrition education program. Most schools send weekly emails to teachers with nutrition education information sourced from the Internet on that week's FFVP offerings. Other schools incorporate nutrition education into the morning announcements, deliver in-class lessons, integrate information into garden or cooking classes, or hand out fact sheets about FFVP produce.

## Nutrition Education Tips

1. Utilize existing nutrition education resources, such as:

- **Hawai'i Child Nutrition Programs Resources.** Hawai'i Child Nutrition Programs has created and compiled a variety of excellent nutrition education resources, including a seasonality chart, preparation tips, lesson plans, nutrition education flyers (produce fact sheets), and food safety information. <http://hcnp.hawaii.gov/overview/ffvp/>.
- **Fresh Choice Hawaiian Harvest Toolkit.** Kōkua Hawai'i Foundation's *Fresh Choice Hawaiian Harvest Toolkit* is a one-stop shop for FFVP nutrition education, packed with colorful produce information sheets that provide nutritional profiles and preparation instructions for various fruits and vegetables. <https://kokuahawaiifoundation.org/aina/hawaiianharvest>.
- **Harvest of the Month™.** The California Department of Health has created a number of nutrition education resources, housed under their Harvest of the Month program. The program includes fact sheets, newsletters, and activities for numerous fruits and vegetables. <http://harvestofthemonth.cdph.ca.gov/>.
- **Fruits and Veggies—More Matters® Fruit & Vegetable Nutrition Database.** Fruits and Veggies—More Matters has created a nutrition, selection, and storage database for an extensive list of fruits and vegetables. <http://www.fruitsandveggiesmorematters.org/fruit-vegetable-nutrition-database>.

2. Integrate FFVP nutrition education into cooking demonstrations, morning announcements, school garden education, story time, and lesson plans for core subjects such as science, language arts, and math. Have each teacher prepare one lesson per week on healthy eating and living.

3. Involve students in nutrition education:

- Have students develop and present commercials or public service announcements about fresh produce.
- Engage the student council in teaching about the health benefits of fresh produce.
- Recruit high school students to mentor younger students on healthy eating.

4. Play games that incorporate nutrition education and make trying new foods fun, such as bingo or word puzzles.

5. If your school has a FoodCorps Service Member, ask the member to prepare FFVP nutrition education materials.

## Communication Tips

Good communication between administrators, FFVP staff, and teachers is essential to implementing the FFVP effectively. It is important for teachers to understand the school's expectations for the program. At the same time, it is important for administrators to provide teachers with tools to successfully integrate the FFVP into their class schedules.

To facilitate good communication:

- Provide teachers with advance notice of the FFVP snacks that will be served each week. Send a weekly email or prepare an FFVP calendar or menu.
- Provide teachers with tools to incorporate the FFVP into their lesson plans. See "Nutrition Education Tips," above.
- Solicit input from teachers and their students to encourage active participation in the FFVP.

## SCHOOL SPOTLIGHT:

### **Kona Pacific Public Charter School**

Kona Pacific Public Charter School has one of two 100-percent, locally sourced FFVPs in Hawai'i. Through the FFVP, Kona Pacific provides a piece of healthy, locally grown produce to every student each school day, amounting to more than 40,000 pieces of fresh produce each year. In addition to procuring local produce for the FFVP, Kona Pacific also procures a variety of local food products for its breakfast, lunch, and summer feeding programs.

Kona Pacific is firmly committed to supporting local agriculture and feeding its students the freshest food possible. The school's local food procurement success stems from a number of factors, including the relationships that school administrators have formed with food aggregators and local farmers. Working with Adaptations, Inc., a food hub located near the school, has been critical to Kona Pacific's success in procuring local food. Adaptations not only aggregates food from local farmers, but also goes a step further by providing local farmers with technical assistance and funding to connect with markets and comply with good agricultural practices. In addition, Adaptations creates markets for underutilized but widely available foods such as local off-grade and gleaned produce.

Kona Pacific has also invested considerable time and energy into developing relationships with small, diversified farms in the area. As a result, the school often receives excess produce during peak season for free or at reduced prices.

To save time and money, Kona Pacific does not cook or serve condiments with its FFVP snacks. If the school receives excess quantities of produce (such as mango or dragon fruit) they cut, freeze, and store the product for future use. Kona Pacific also saves money by purchasing off-grade produce with minor cosmetic imperfections.

Nutrition, gardening, and agriculture education is integrated throughout the curriculum for all grades at Kona Pacific. For the FFVP, FoodCorps Service Members assist with creating lessons on specific fruits and vegetables.

Kona Pacific's off-site kitchen receives, stores, and cuts FFVP produce; an office staff person plates the snacks; and students collect snacks daily from the school's food service kiosk.

# ACKNOWLEDGEMENTS

The Kohala Center thanks the following individuals for their invaluable contributions to this report:

- Glenna Owens, Director, School Food Services Branch, Hawai‘i Department of Education
- Dexter Kishida, Supervisor, School Food Services Branch, Hawai‘i Department of Education
- Jennifer Dang, FFVP & Special Projects Coordinator, Hawai‘i Child Nutrition Programs
- Lynn Vidal, USDA Foods Distribution Program, Hawai‘i Child Nutrition Programs
- Daniela Kittinger, President, Hawai‘i Food Policy Council
- Robyn Pfahl, Esq., PONO Resolutions, LLC
- Chris Hecht, Executive Director, Kona Pacific Public Charter School
- Usha Kilpatrick Kotner, Former Director, Kona Pacific Public Charter School
- Shiloh Wright, Office Manager/Nutrition Program Coordinator, Kona Pacific Public Charter School
- Amalie Dorn, Cafeteria Manager, Volcano School of Arts & Sciences
- Jennifer Bach, Farm to School Coordinator, Laupāhoehoe Community Public Charter School
- Alice Sherer, Marketing & Grower Relations, Adaptations, Inc.
- Brent Sasaki, Manager, Cal-Kona Produce
- Earl Kashiwagi, President, Esaki’s Produce
- Derrick Shiraki, Owner, Finest Food Company
- Brandon Bartolome, Marketing Coordinator, Hilo Products
- Kahealani Keaulana, Human Resources Manager, So Ono Food Products
- Shirley Watanabe, Owner, Watanabe Vegetable Processing

# INTRODUCTION

Farm to school encompasses a variety of efforts to connect communities and students to fresh, nutritious food in order to encourage healthy eating habits and strengthen local economies. Farm to school generally includes three core elements: (1) **school gardens**; (2) nutrition, agriculture, health, and food **education**; and (3) the **procurement** of local foods for school meals. The first and second elements aim to help students become “citizen eaters” who understand the connections between food, health, and agriculture. The third aims to create pathways to deliver local produce directly into school food programs, such as the National School Lunch Program and the USDA Fresh Fruit and Vegetable Program.

Over the last decade, Hawai‘i’s farm to school initiatives have been steadily gaining momentum, prompted by grassroots groups and government agencies looking closely at the issue of children’s health and nutrition in schools. With respect to procurement, the Hawai‘i State Legislature has taken several steps to advance the development of a farm to school procurement program in Hawai‘i:

- In 2009, the Hawai‘i State Legislature passed Senate Concurrent Resolution 121, which requested that the University of Hawai‘i convene a working group to consider the feasibility of establishing a statewide farm to school program in the Hawai‘i Department of Education. The resulting report to the 2010 Legislature condensed the barriers to a statewide farm to school procurement program into three categories: high costs, procurement barriers, and inadequate supply.<sup>1</sup>
- In 2011, the Hawai‘i House of Representatives passed House Resolution 145, requesting that the Hawai‘i Department of Agriculture convene a working group to examine similar issues. In the final report to the 2012 Legislature, the working group also found that costs, procurement policies, and supply issues were at the heart of the problem, and laid out additional measures for the state to examine.<sup>2</sup>
- In 2015, the state took a significant step forward with the passage of Act 218 (SB376 SD2 HD1 CD1), which appropriated funds to create a Hawai‘i Farm to School Program and Farm to School Coordinator within the Hawai‘i Department of Agriculture. The Coordinator will be responsible for working in collaboration with stakeholders to address the issues of supply, demand, procurement, and consumption of Hawai‘i-grown foods in state facilities, primarily education facilities, and to take reasonable steps to incorporate more agriculture and nutrition education in schools.

This report examines the challenges to procuring local food for schools in Hawai‘i and highlights several opportunities to advance beyond those challenges.

# CHALLENGES TO LOCAL FOOD PROCUREMENT

## Supply

Hawai'i has only one school district, which includes all 255 regular public schools throughout the Hawaiian Islands. The Hawai'i Department of Education (DOE) ranks as the ninth largest school district in the nation, based on 2012-13 school year enrollment numbers, and is the only statewide school district in the country. Hawai'i also has 34 public charter schools and over 100 independent schools, many of which offer food service to their students.

The DOE's School Food Services Branch (SFSB) is the sole school food authority for all regular public schools in Hawai'i. SFSB feeds approximately 100,000 students and school staff each day. To promote efficiency, the DOE has generally sought school food contractors that can supply the entire district with a given item or category of items. While efficient, this approach constrains the DOE's ability to procure local food, as local food production levels generally cannot support procurement for the entire district.

Demand for local food in Hawai'i exceeds supply. Hawai'i imports approximately 85 percent of the food consumed throughout the islands, according to estimates by the Rocky Mountain Institute.<sup>3</sup> Food distributors interviewed by The Kohala Center have reported that papaya is one of the few local crops available year-round. It is unlikely that any farm in Hawai'i could consistently supply enough of a single crop for the entire school district or that local food distributors could consistently aggregate a sufficient quantity of local crops to supply the entire district.

Increasing local food production in Hawai'i will require a number of strategies to address the production challenges faced by farmers. For more on Hawai'i's food supply challenges, see *Reflections on Hawai'i's Food System by Food Hubs and Distributors (right)* and *Factors Impacting Local Food Production (page 5)*.

## Reflections on Hawai'i's Food System by Food Hubs and Distributors

The Kohala Center surveyed food hubs and distributors throughout the Hawaiian Islands in order to better understand the challenges to, and opportunities for, sourcing local food for schools.

All of the respondents expressed the desire to buy more local food, both for schools and other markets. Formal contracting with local farmers was uncommon among the respondents, but most expressed an interest in contracting with farmers if the distributor had a contract to supply local schools and if the contract contained provisions to address supply issues, such as the option to fill orders with imported produce when local supplies are unavailable.

### What are the primary challenges you face in sourcing Hawai'i-grown produce?

- *Pricing and volume. There's not a large enough supply.*
- *Consistency.*
- *Not enough farmers. Need more supply.*
- *Farmers don't communicate shortages on time. We need reliability.*
- *No central way to find out what's available. The only way we know what is out there is word-of-mouth or if farmers come to us directly.*
- *For schools, seasonality is the main issue. The peak season for many crops is during the summer.*
- *Farmers could benefit from training on grading, packing, and timely communication. Some distributors shy away from buying local because of experiences with late deliveries and poor quality.*
- *Many folks like to farm, but don't run the business side effectively.*
- *Unreliable food safety practices, such as using non-potable water to wash produce.*

### What do you think would help increase production of Hawai'i-grown produce?

- *More markets for farmers; more places where food is aggregated.*
- *More farms, more ag land. Community-centered farms that supply food to the surrounding region.*
- *More professionalism, more emphasis on business administration in farmer training. HR, finance, and business skills are needed.*
- *Preserve access to Hawai'i's farmlands by preventing development.*
- *More access to affordable water and help developing a farm workforce.*
- *Helping farmers access markets and figure out what crops grow well on their land.*

## Factors Impacting Local Food Production

The following abbreviated summary touches upon some of the numerous factors that impact commercial farming and food production in Hawai'i.

### Access to affordable, suitable agricultural land

The cost of land in Hawai'i is the highest in the nation, with the exception of Washington, DC.<sup>4</sup> Development pressures in Hawai'i necessitate careful land management to ensure the availability of affordable agricultural lands. Large landowners in Hawai'i offer a variety of agricultural land leases, but there are significant variations in the cost, terms, size, suitability, and availability of the leases and their accompanying parcels. In addition, residential uses of agricultural lands by lessees and landowners have reduced the inventory of quality, affordable agricultural lands for farming. To prevent residential uses of agricultural lands, many lessors prohibit farmers from living on leased farmland, further increasing costs for commercial farmers.

Farmers would benefit from access to affordable short-term and long-term leases for various-sized parcels to accommodate beginning and experienced farmers, as well as small-scale diversified agriculture and larger operations. Landowners and policymakers should give more consideration to farmer and farmworker accommodation on and near leased farmland, given the costs of living and doing business in Hawai'i. Commercial farmers would also benefit from the ability to purchase affordable farmland to secure their investment and access capital. Landowners interested in selling farmland can preserve the agricultural and rural character of the land through conversation easements. Limiting tax, water, and other benefits to bonafide commercial farming operations and public benefit initiatives, such as community gardens, would help preserve the availability of prime agricultural lands for food production.

### Access to affordable agricultural inputs

Importing fertilizer, feed, building materials, equipment, and energy impacts the cost of food production in Hawai'i, including the cost of building essential infrastructure to access water and electricity. Increasing access to renewable energy sources, preserving and restoring watersheds, creating and maintaining water collection storage, distribution, and irrigation systems, and ensuring access to affordable water are essential to food production in Hawai'i.

Agricultural cooperatives and food hubs can help farmers reduce costs and access resources by facilitating: (1) bulk purchasing to secure better prices; (2) cost-sharing for processing, transportation, and certifications, including food safety; (3) product aggregation to reach larger markets; and (4) natural resource management.

### Food safety

New food-safety laws will likely impact all farms—either directly through certification requirements or indirectly through market-driven insurance requirements—thereby increasing the cost of farming for large and small producers. Education, training, technical assistance, low-cost certification programs, and food-safety-certified food hubs will help farmers maintain financial viability while meeting new legal and industry food-safety standards.

### Expanding processing infrastructure

Expanding the availability of food-safety-certified food processing infrastructure (e.g., wash/pack/cold storage facilities, cook-chill facilities, co-packers, slaughterhouses, etc.) can help food producers access more markets, including schools which often purchase pre-cut and pre-cooked foods, such as carrot sticks and tomato sauce. Value-added processing facilities could also help create a more consistently available supply of local foods. Although Hawai'i has a 12-month growing season, most crops have peak seasons. Value-added processing would expand the range and availability of local food products in Hawai'i.

### Access to capital

A variety of organizations offer loans to farmers in Hawai'i. However, many farmers are unable to qualify for loans because they: (1) lack collateral to secure loans, (2) lack sufficient cash to meet minimum equity requirements for the projects they seek to finance, and/or (3) fail to meet specific program eligibility requirements. In addition, a number of grants are available to assist agricultural businesses, but few of these provide funding directly to farms for equipment and infrastructure. Grant, investment, and loan programs tailored to address these gaps would help Hawai'i's farmers access funds needed to launch and grow local farms.

### Education and training

There are a number of promising farmer education programs in Hawai'i, including The Kohala Center's Beginning Farmer-Rancher Development Program and GoFarm Hawai'i. However, more is needed to recruit new farmers and increase the likelihood of success. A national FarmCorps program could help develop a new generation of farmworkers and farmers. Agricultural business degrees at the undergraduate or graduate level could help aspiring farmers develop business skills essential to running a commercial farm. At the primary and secondary school levels, hands-on learning experiences in school gardens and science curricula that incorporate agriculture modules can help familiarize new generations with how food is grown.

## Costs

Food prices present an additional challenge to the procurement of local foods for school meals. Hawai‘i is an expensive place to farm. Farm inputs—including feed, fertilizer, equipment, and fossil fuels—are all imported and often priced higher than in the continental United States. Energy costs<sup>5</sup> are the highest in the nation, as are land costs (with the exception of Washington, DC).<sup>6</sup>

Higher food costs would be particularly difficult for schools to bear without additional resources. A large part of the funding for school lunch programs in Hawai‘i comes from the federal government through the National School Lunch Program (NSLP). NSLP provides funding to the state as a reimbursement, at a rate of \$3.74 per lunch (for free meals; less for reduced or paid meals). For the DOE, this rate is insufficient to cover the full cost of lunch, which was \$5.51 per lunch during the 2013-14 school year. Although the DOE has requested an increase in Hawai‘i’s federal reimbursement rate, increased costs would further strain tight school budgets.

## Procurement Laws

State procurement law requires state agencies, including the DOE, to conduct a competitive procurement process to award contracts for all purchases. The various formal procurement processes can be administratively complex for state agencies and vendors. Large contracts are generally awarded to the lowest bidder. Although Hawai‘i has a 15 percent price preference available for local agricultural products, penalties associated with nonperformance discourage vendors from taking advantage of the price preference, particularly in the case of local crops that are subject to a number of production risks. Additional contracting requirements—such as vendor compliance with numerous governmental entities, registration for procurement solicitation information, projecting future prices on volatile agricultural markets, and accepting risks of potential contract default—have shown to be hurdles that local producers and distributors are often unwilling to cross to contract with the state.

# OPPORTUNITIES

## Localizing School Food Procurement and Leveraging DOE Purchasing Power

Shifting from a district-wide procurement model to a localized approach to procurement would create more manageable-sized markets for local farmers to supply, either directly or, more likely, through distributors. In addition, the use of forward contracts—with reasonable price adjustment terms and sufficient flexibility to substitute imports when local supplies are unavailable—could help stimulate local food production for school food programs. In this way, it may be possible to utilize the DOE’s tremendous buying power to stimulate local food production in Hawai‘i and over time supply an increasing number of schools with local food.

To experiment with a more localized approach to procurement, the DOE could implement a **local food procurement pilot project** in one or two clusters of schools located near agricultural centers. Starting with a pilot project would allow the DOE to phase in new processes and procedures to facilitate a **farm to school procurement cycle** to include:

- developing localized school food menus that incorporate locally grown foods and traditional foods, such as ‘ulu (breadfruit);
- conducting a “Request for Information” (i.e., a market study to evaluate the availability and price of local foods);
- writing procurement specifications with “buy local” terms that comply with state and federal law; and
- entering into forward contracts with price adjustment terms that account for market fluctuations and terms that allow backfilling with imported produce when local supply is not available.

*\*Adapted from Hawai‘i Child Nutrition Programs’ Procurement Cycle Illustration*

The state might also consider **decentralizing the DOE’s School Food Services Branch** by breaking the district into smaller food procurement units, such as counties, islands, school complex areas, school complexes, or communities.

## Developing Procurement Laws That Facilitate Local Food Procurement

To help develop a school food procurement approach that is conducive to sourcing local food, state legislators introduced in 2015 a bill to establish a **special innovative procurement process** for the procurement of goods and services in Hawai‘i. Special innovative procurement would provide state agencies with the flexibility to develop customized procurement procedures in order to address a unique need, such as developing a local food purchasing structure. Two special innovative procurement bills were introduced during the 2015 Hawai‘i legislative session, but failed to pass. Advocates plan to reintroduce a special innovative procurement bill during the 2016 Hawai‘i legislative session.

## Building Farm to School Procurement Programs at Charter Schools

Each charter school in Hawai‘i is an independent school food authority that procures food separately from the DOE. In addition, charter schools are exempt from the Hawai‘i Public Procurement Code. As a consequence, charter schools have more autonomy and flexibility in their school food purchases than regular public schools.

Charter schools can use their food procurement flexibility to develop their own farm to school procurement programs and develop the farm to school supply chain in Hawai‘i. To do so, charter school food service managers would benefit from technical assistance to develop school food menus that include local foods; conduct requests for information from suppliers; and develop procurement policies, specifications, and contracts that are conducive to sourcing local food while complying with state and federal law. The Kohala Center is currently working with a group of charter schools on Hawai‘i Island to explore options for joint administration of, and joint procurement for, charter school meal programs, including local food procurement.

## Evaluating Costs

It is commonly thought that food produced in Hawai‘i is more expensive than imports and, thus, beyond the budget for most school food programs. However, recent data suggests that for at least some crops, the price of local food may be comparable to, or even lower than, imports. Recent studies by researchers at the University of Hawai‘i at Mānoa examine prices of local and imported tomatoes and lettuce. The tomato study revealed a combination of price premiums and price discounts for local tomatoes and found that “prices of local tomatoes produced in Hawai‘i are on average lower than their imported counterparts.”<sup>7</sup> The lettuce study found “no demonstrable price premium for fresh packaged local lettuce in the Honolulu retail market... Instead, price variations are primarily attributable to differences in the overall quality of the products and other product characteristics.”<sup>8</sup> Thus, at least some local foods may be affordable for schools.

The DOE does not track the origin of produce purchased by schools for meal programs. However, conversations with distributors and data on the **Department of Defense Fresh Fruit and Vegetable Program (DoD Fresh)**, all indicate that Hawai‘i’s schools are procuring some local produce. From July 1–September 22, 2015, 26 percent of the fresh produce purchased by schools with federal entitlement dollars from the DoD Fresh program was grown in Hawai‘i. DoD Fresh, operated by the Defense Logistics Agency (DLA), provides schools with USDA Foods entitlement dollars to purchase fresh produce. DLA contracts with produce vendors who in turn source food to supply a specific region. Hawai‘i’s DoD Fresh vendors have included Hilo Products (Hawai‘i Island), Esaki’s Produce (Kaua‘i), Watanabe Vegetable Processing (Maui), and Ham Produce and Seafood (O‘ahu), among others. DoD Fresh encourages vendors to buy local, and Hawai‘i-grown items available through DoD Fresh have included bean sprouts, bok choy, broccoli, cabbage, cantaloupe, cucumber, ginger, honeydew, romaine lettuce, iceberg lettuce, green leaf lettuce, green onions, papaya, bell peppers, squash, tomatoes, watercress, and watermelon.

A DOE **data collection and analysis** project for school meal programs would help to determine the identity, cost and percentage of local foods purchased by public schools. A data project would also help determine if the local foods currently purchased by schools are priced comparably to imports or subsidized by funding programs, such as DoD Fresh.

Other tools for schools to evaluate the affordability of local foods include: (1) conducting a **Market Study / “Request for Information”** from local vendors to gauge the availability and price of local foods, and (2) issuing a **“Request for Proposals”** from local vendors to bid on supplying fresh produce to schools, including locally grown crops.

## Local Food Procurement Funding

For some crops, schools may require additional funding to buy local.

Funding from the **USDA Fresh Fruit and Vegetable Program (FFVP)** is helping schools serve local fruits and vegetables that are generally not included in school lunch menus, such as dragon fruit and rambutan. The FFVP provides federal funds to low-income elementary schools to purchase fresh fruits and vegetables to serve as snacks between meals during the school day. FFVP menu and budget requirements are more flexible than the school lunch program. This flexibility allows schools to purchase a wide variety of produce. Although the state does not track the origin of produce sourced for the FFVP, anecdotal evidence and a small data collection project indicate that FFVP funding is helping schools procure local foods.

Additional funding to support local food procurement could also be obtained through the **appropriation of state funds for local school food procurement**, similar to recent legislation passed by the Oregon State Legislature (SB 5507 and SB 501) resulting in the appropriation of over \$4.5 million in extra funding for Oregon schools to purchase local foods.

## FARM TO SCHOOL PROCUREMENT STRATEGIES

Schools, districts, agriculture departments, and nonprofits throughout the United States have developed a variety of farm to school procurement programs with varying goals, scopes, and degrees of success. The following section highlights some successful and promising strategies for incorporating more local food into school meal programs.

### Work with Vendors Committed to Buying Local

#### *Kona Pacific Public Charter School, Hawai‘i Island*

Working with a local food hub that is committed to sourcing local food has been a successful farm to school strategy for Kona Pacific Public Charter School (KPPCS) on Hawai‘i Island. KPPCS serves breakfast, lunch, and snacks to 230 students, and also operates a community food service program for hundreds of local residents that participate in Head Start, the Hawai‘i County Summer Fun program, and KPPCS’ summer food service program.

For the 2014-15 school year, 42 percent (by dollar value) of the food purchased by KPPCS was produced in Hawai‘i, including a 100 percent locally-sourced USDA Fresh Fruit and Vegetable (Snack) Program. KPPCS’ success stems from a number of factors, including the relationships that school administrators have developed with local farmers and distributors. KPPCS procures food directly from farmers and also through Adaptations Inc., a food hub located near the school.

Adaptations specializes in aggregating food from local farmers. To address some of the local sourcing issues experienced by distributors, Adaptations provides local farmers with technical assistance and funding to connect with markets and comply with good agricultural practices. In addition, Adaptations creates markets for under-utilized, but widely available foods, such as local off-grade and gleaned produce. By finding a partner that shares their commitment to local food, KPPCS has built a robust farm to school procurement program.

### *Volcano School of Arts & Sciences, Hawai'i Island*

Volcano School of Arts & Sciences (VSAS), a public charter school on Hawai'i Island, has been able to procure up to 43 percent of its food from local sources by partnering with Hilo Products, a local food distributor that has built relationships with many local farmers, and by buying directly from farmers near the school. VSAS builds menus that incorporate local products that are in season, networks with local food producers, and recently began forward contracting with a local farmer. By prioritizing local food, and finding suppliers that share their commitment, VSAS has been able to build the foundation of a strong farm to school procurement program.

### *REAP's Farm to School Program in Madison, Wisconsin*

Thirteen schools in Madison, Wisconsin, partner with the REAP Food Group to receive hundreds of pounds of local food each week for the schools' USDA Fresh Fruit and Vegetable Programs (FFVP). REAP is a non-profit organization dedicated to building a local food system that supports small family farms and locally owned businesses. REAP sources, washes, cuts, and packages FFVP snacks for participating schools, along with an educational "Snack Bite" that provides nutritional and agricultural information about the snacks for teachers to share with students. In 2014, REAP distributed over 180,000 snacks to more than 5,500 students.<sup>9</sup>

## **Start with a Pilot Project**

### *Riverside Unified School District, California – Farmers' Market Salad Bar*

Starting with and gradually expanding a pilot program helped the Riverside Unified School District (RUSD) test and revise its farm to school procurement program. RUSD is the 15<sup>th</sup> largest district in California, serving approximately 43,000 students at 47 schools, including 30 elementary schools. RUSD began its farm to school program in 2005 to offer elementary students healthy and nutritious food choices through a locally-sourced salad bar. The farm to school program started as a pilot in one elementary school and expanded over time. By 2010, the program was in 29 elementary schools.

Initially the program offered the salad bar as an alternative to a hot entrée. Based on student feedback, the district modified the program in 2012 and now offers both a hot entrée and the salad bar. Students first visit the salad bar, which offers fresh fruits, vegetables and proteins for their lunch plate. They then receive a hot entrée from the serving line. The program is revenue-neutral for the District, sources 50–100 percent local produce (depending on the time of year), and led to the formation of a farmer cooperative to supply schools throughout the district and beyond.<sup>10</sup> In 2014, the student participation rate was 70 percent, and the program currently reaches over 20,000 students.<sup>11</sup>

## **Start with One Day a Week or Month**

### *California Thursdays™*

In California, selecting one day per week or per month helped schools ease into new local food procurement programs, while gradually exposing students to new foods. With support from the Center for Ecoliteracy, the Oakland Unified School District launched in 2013 its California Thursdays farm to school program, featuring locally-sourced, freshly-prepared meals on one Thursday a month for the district's 21,000 students. Oakland Unified began offering the program weekly in 2014. As reported by the Center for Ecoliteracy, 42 California school districts—which collectively serve over 250 million school meals each year—now participate in California Thursdays, including the Los Angeles Unified School District, which has 1,270 schools.<sup>12</sup>

## Highlight Local Foods

### *Portland's Local Flavors Program*

Incorporating select ingredients into familiar recipes gave Portland Public Schools (PPS) an opportunity to highlight and introduce new foods to students, while maintaining cafeteria favorites. In 2007, PPS launched a local lunch program to serve a 100 percent locally sourced lunch once a month. Feedback from students indicated that the 100 percent locally sourced lunches were too great of a departure from their favorite menu items. As a result, the district revised its approach and developed the “Local Flavors” program, which highlights local food products throughout the district’s menus on a more regular basis. The district serves approximately 45,000 students in 86 public schools, sourcing over 30 percent of its food from local producers.<sup>13</sup>

## Hire a Farm to School Coordinator

### *Laupāhoehoe Community Public Charter School Farm to School Program*

Hiring a farm to school coordinator has helped Laupāhoehoe Community Public Charter School on Hawai‘i Island attain a 100 percent locally sourced USDA Fresh Fruit and Vegetable Program (FFVP). The farm to school coordinator is responsible for running the school garden program and procuring local food for the school’s FFVP. Having a dedicated staff person to build relationships with local farmers and food distributors has resulted in a consistent supply of local fruits and vegetables to serve as snacks during the school day.

### *Arizona Farm to School Program*

Hiring a farm to school specialist has helped Arizona school districts access farm to school procurement resources and build connections with local vendors. In 2011, the Arizona Department of Education hired a farm to school and school garden specialist to coordinate and foster local food procurement efforts by school districts throughout the state. The specialist works with a 15-member advisory board comprised of representatives from state agencies, school districts, the farm bureau, extension services, brokers, processors, and farmers. To help Arizona school districts source local food, the specialist has created a variety of local food procurement resources, including guidebooks and a database of local food vendors. The specialist also regularly organizes buyer/grower meetings and farm tours to connect local schools to local farmers.

### *Oklahoma Farm to School Program*

In 2006, the “Oklahoma Farm to School Program Act” was signed into law, formally establishing the Oklahoma Farm to School Program within the state’s Department of Agriculture, Food and Forestry. The program employs an administrator to provide farm to school program development resources, conduct workshops, and offer technical assistance to farmers, food service directors, processors, and distributors. The program also maintains a farm to school website to assist schools and farmers seeking information on fresh food procurement.

## Expand Supply Through Gleaning Networks

### *New Hampshire Gleaning Networks*

Gleaning is the process of collecting food that farmers do not plan to harvest for various reasons (e.g., excess supply or cosmetic shortcomings), and donating that food to schools, food pantries, and other community organizations. The New Hampshire Farm to School Program, housed at the Sustainability Institute at the University of New Hampshire, is overseeing the development of six gleaning networks run by regional gleaning coordinators. By tapping into an undeveloped supply source, the networks have the potential to access low-cost local food for schools and prevent waste.

## CONCLUSION

Maximizing local food procurement by Hawai‘i’s schools will require a multifaceted approach to overcome challenges and pursue opportunities. Efforts to localize DOE school food procurement will require shifts in state procurement laws and DOE policies and procedures, and most likely increases in DOE resources and staff to conduct multiple procurements, complete market studies, develop new menus, train cafeteria staff, and manage multiple contracts. Building charter school farm to school programs will require technical assistance to help schools refine their menus, train cafeteria staff, and develop new procurement procedures and contracts. Local distributors and farmers may also need assistance with responding to DOE and charter school procurement solicitations, developing forward contracts, and overcoming production and supply chain challenges.

Current food production levels in Hawai‘i mean that moving forward will require starting small, developing successful models and practices, and expanding as the market allows. The farm to school opportunities and strategies outlined in this report offer a number of starting points—from serving one local meal per month, to highlighting specific local crops, to partnering with vendors that are committed to buying local. For Hawai‘i, one of the best steps forward may be the creation of a Farm to School coordinator within the DOE to coordinate a local food procurement pilot project, collect data, develop forward contracts, and liaise with the Hawai‘i Department of Agriculture’s Farm to School Coordinator.

Over time, the buying power of schools in Hawai‘i has the potential to drive increases in local food production for child nutrition programs. The benefits of doing so include increasing Hawai‘i’s food security, strengthening Hawai‘i’s economy, forging closer connections between communities and local food producers, and positively impacting community health by fostering nutritious eating habits at a young age.

## FARM TO SCHOOL INITIATIVE ASKS FARMERS TO SUBMIT BIDS

Posted on Jul 1, 2016 in Farm to School (<http://ltgov.hawaii.gov/blog/category/farm-to-school/>) , Featured (<http://ltgov.hawaii.gov/blog/category/featured/>) , Main (<http://ltgov.hawaii.gov/blog/category/main/>) , Press Releases (<http://ltgov.hawaii.gov/blog/category/press-releases/>)

HONOLULU — The Farm to School Initiative is seeking qualified farmers and vendors to submit bids to deliver fresh fruit and vegetables to various Hawaii State Department of Education (HIDOE) schools statewide. **Local farmers are encouraged to submit their bids by July 13.** The invitation for bids (IFB) can be found at <http://spo3.hawaii.gov/notices/notices/ifb-d17-005>.

Spearheaded by Lt. Governor Shan Tsutsui, the HIDOE and Department of Agriculture are working collaboratively on the Initiative. The goal is to address the supply and demand issues surrounding the purchasing of local food for our school cafeterias. The Initiative also aims to systematically increase State purchasing of local food for our school menus as well as connect our keiki with their food through the use of products from the local agricultural community.

“With Hawaii importing about 85 percent of our food, the Farm to School Initiative is one way we are working towards becoming food sustainable in our state,” said Lt. Governor Tsutsui. “While supporting local farmers and our economy, we are also feeding our students with locally-grown fresh fruit and vegetables.”

HIDOE has 256 public schools and its School Food Services Branch feeds approximately 100,000 students and staff each day.

“We’ve made it a priority to purchase local produce, however, our options have been limited,” said Superintendent Kathryn Matayoshi. “We are hopeful that this initiative will allow for more locally-based products to be used in our schools’ food services while keeping costs reasonable.”

“We encourage local farmers to participate in this program,” said Scott Enright, Chairperson of the Hawaii Board of Agriculture. “One of the challenges farmers face is the uncertainty of supply and demand and this program will help farmers plan and grow their crops with the knowledge that there will be a market for their produce. In addition, keiki will be able to grow up with an appreciation of locally grown fruits and vegetables.”

Across the nation, farm to school programs are reconnecting students to a better understanding of the food system and where their food comes from. Farm to school programs introduce students to healthier eating habits and help them become familiar with new vegetables and fruits that they and their families will then be more willing to incorporate into their own diets.

In April, the Farm to School Initiative gathered information from farmers and ranchers as well as hosted a mixer to inform them on how to become a qualified vendor with the State. Those events, including the IFB, culminates with the Farm to School Initiative Pilot Project, which is expected to begin in 2017.

# *Make the farm to school connection*

Tuesday, June 30 • 3–4:30 p.m.  
Hawai'i Academy of Arts and Science,  
15-1397 Homestead Road, Pāhoā

**T**he farm to school movement is gaining momentum in Hawai'i. Island farmers and distributors are invited to a mini trade show to meet public charter school reps who are leading the charge to create a local supply chain to feed our keiki fresh, nutritious, locally grown food—*your* food!

**Farmers:** Bring samples of your produce and meet school food buyers who want to purchase your food for school food programs, including the USDA Fresh Fruit & Vegetable Program. If your crops are not ready for harvest, bring photos of your produce and farm.

**Distributors, Food Hubs, and School Meal Vendors:** Come meet farmers and schools and help us develop a local school food supply chain.

## **Exhibition Space**

Tables will be available for you to exhibit produce and information about your farm.

## **Register by June 25**

Registration is free but space is limited.

Reserve your spot online at [koha.la/f2smixer](http://koha.la/f2smixer) or call The Kohala Center at 808-887-6411.

Hosted by The Kohala Center and the  
Arts & Sciences Center, home of Hawai'i Academy  
of Arts and Science Public Charter School.

**THE KOHALA CENTER®**

# *Make the* **farm to school connection**

Wednesday, April 27 • 1:30–4 p.m.  
Office of the Lieutenant Governor  
Hawai'i State Capitol, Fifth Floor  
Honolulu, Hawai'i

*Parking will be available at the Capitol*

*Hosted by:*

Lieutenant Governor of the State of Hawai'i  
Hawai'i Department of Agriculture  
The Kohala Center  
Hawai'i Farm Bureau • Hawai'i Farmers Union United

*The Kohala Center is an equal opportunity provider, employer, and lender.*

**T**he farm to school movement is gaining momentum in Hawai'i! O'ahu farmers, distributors, food hubs, school food vendors, and schools are invited to a **Farm to School Information Session and Mixer**.

The Hawai'i Department of Agriculture's farm to school coordinator will share information on **upcoming opportunities** to sell local food to schools and connect with other institutional markets. The coordinator will be available to answer questions such as:

- What **vendor qualifications** are needed to contract with the state?
- What is the **Local Food Survey Request for Information** (<http://koha.la/hdoa-foodsurvey>), and how will the information be used?
- What types of **state contracting opportunities** are available and how to access them?

**Farmers:** Bring samples of your produce to showcase your food to school food representatives, distributors, and food hubs, while learning about opportunities to supply your food for school food programs. If your crops are not ready for harvest, bring photos of your produce and farm. Tables will be available for you to exhibit produce and information about your farm.

**Schools, Distributors, Food Hubs, and School Meal Vendors:** Come meet O'ahu's local farmers and learn how you can support the development of a local school food supply chain.

**Register by April 21**

Registration is free but space is limited.

Reserve your spot online at [koha.la/f2smixeroahu](http://koha.la/f2smixeroahu) or call The Kohala Center at 808-887-6411.

## USDA Fresh Fruit and Vegetable Program

# Procurement Meeting

Please join us for a USDA Fresh Fruit and Vegetable Program procurement meeting with Jennifer Dang, FFVP & Special Projects Coordinator at the Hawai'i Department of Education.

The USDA Fresh Fruit and Vegetable Program (FFVP) provides funding to eligible K-6 schools to purchase fresh produce for morning and afternoon snacks. The FFVP is a unique opportunity for Hawai'i farmers and distributors to introduce local fresh fruits and vegetables to our schools and provide island keiki with healthy, nutritious snacks grown right here at home.

The goals of the meeting are to:

- *inform schools and produce vendors of the federal procurement requirements relating to the FFVP; and*
- *discuss how the FFVP can help develop a local farm to school supply chain.*

## HOW TO REGISTER

To register, please email [dmitts@kohalacenter.org](mailto:dmitts@kohalacenter.org) or call The Kohala Center at 808-887-6411. Registration is free, but space is limited.

### Hawai'i Island Meeting

Friday, March 13, 2015  
1:00 - 2:30 p.m.

Komohana Research Extension Center  
Polycom Room  
875 Komohana Street  
Hilo

### O'ahu Meeting

Friday, March 20, 2015  
10:00 a.m. - 12:00 p.m.

Dole Office Building  
Castle & Cooke side  
Suite 300 – Kaua'i Conference Room  
650 Iwilei Road  
Honolulu

**THE KOHALA CENTER®**  
education. environment. empowerment.

**Everybody is invited to the  
'Bring Your Favorite Side Dish'  
POTLUCK MEMBERSHIP MEETING**

**Wednesday, April 29, 5:30 PM TO 7:30 PM**  
**Yano Hall**  
**82-6156 Mamalahoa Highway**  
**Captain Cook, HI 96704**

**Program:**

- **Anna Lisa, *The Kohala Center***  
Farm to school – opportunities for farmers to sell produce for school consumption
- **Diana Duff, *FarmWorks***  
Grant opportunities for farmers
- **Master Gardener Updates**
- **Legislative Updates**
- **Upcoming Events**
- **Fresh Produce Exchange!**

**A delicious Main Dish will be provided by Lotus Café!**

**If no time to prepare a side dish, \$10 donation accepted**

**For further information, please call Jackie at 327-3680**

**Come for Fun, Food, Info and get to know a Farmer!**

# THE KOHALA CENTER

---

RURAL AND COOPERATIVE BUSINESS  
DEVELOPMENT SERVICES™

[KohalaCenter.org/Business](http://KohalaCenter.org/Business)

# Rural and Cooperative Business Development Services

*Expand and strengthen Hawai'i's rural economies and food systems*

- **Cooperative Business Education**
- Group Facilitation & Organization
- Strategic Project Planning
- Feasibility Assessment
- Business Planning
- **Farmer-Rancher Education**
- Market Analysis
- **Micro-lending**
- **Grant Writing & Capitalization Strategies**
- Legal Document Assistance
- Professional Referrals
- Board & Member Trainings
- Conflict Resolution
- Agricultural Education
- **Rural Economic Development Projects**

# Farm to School

## Goals

- **Procurement** of local foods for schools
- **Student education** related to agriculture, food, health and nutrition
- **School gardens** for hands-on learning

## Benefits

- **Health impact:** Exposes students to fresh, healthy fruits and vegetables
- **Community impact:** Connects students, educators, and families to local agriculture and ecology
- **Economic impact:** Promotes schools as an important market opportunity for local

# Types of School Food Programs

- Breakfast
- Lunch
- Dinner
- **Healthy Snacks: USDA Fresh Fruit & Vegetable Program**

# USDA Fresh Fruit & Vegetable Program

- Federal funds for low-income elementary schools to buy fresh fruits and vegetables to serve as snacks during the school day between meals
- Generally served raw; some lightly steamed vegetables (taro, ulu)
- Pre-cut servings or whole small fruit.
- FFVP snack served generally at least twice a week to all elementary students
- Schools and aggregators are looking for local produce

# FFVP: Point of Entry

- Individual schools can choose what they order, rather than menus being set a district level
- Wide variety of fruits and vegetables desired
- More generous budget than lunch program

# Maui FFVP Schools (2014/2015)

School	# of Elem. Students
Haiku Elementary	489
Kahului Elementary	922
Kamali'i Elementary	545
King Kamehameha III Elementary	782
Kula Elementary	391
Makawao Elementary	546
Pa'ia Elementary	345
Princess Nāhi'ena'ena Elementary	726
Pukalani Elementary	450
Waihe'e Elementary	759
Wailuku Elementary	725

**Total # of Students: 6,680**

# Fresh Produce Purchased for FFVP

Apples	Clementines	Papaya	Sweet Potatoes
Asparagus	Kale	Peach	Tangelos
Avocado	Kiwi	Pears	Tangerines
Banana	Kumquat	Pineapple	Taro
Bell Peppers	Lettuce	Plum	Tomato
Blackberries	Lilikoi	Pumpkin	Ulu
Blueberries	Longan	Rambutan	Watercress
Broccoli	Mango	Raspberries	Watermelon
Cantaloupe	Mushrooms	Spinach	Zucchini
Carrots	Nectarines	Starfruit	
Cauliflower	Okra	Strawberries	
Celery	Oranges	String Beans	

# Estimated Annual FFVP Poundage Requirements (2014/2015)

	Maui	Statewide
Broccoli	2,000 lbs	9,200 lbs
Papaya	2,300 lbs	10,500 lbs
Pineapple	3,100 lbs	14,000 lbs
Taro	2,500 lbs	11,300 lbs
Ulu	3,500 lbs	15,800 lbs
Zucchini	1,700 lbs	7,600 lbs

# Poundage Requirements (by School Food Serving Size)

Fruit/Vegetable	Serving Size	Servings per Pound	Pounds for 100 Servings
Avocado	¼ cup raw	8.2	12.2
Bananas (petite)	¼ cup raw	6.5	15.4
Bananas (regular)	¼ cup raw	7.1	14.2
Bell Peppers	¼ cup raw	9.7	10.4
Cucumber	¼ cup raw	11.1	9.1
Lilikoi	¼ cup raw	3.5	29.0
Mango	¼ cup raw	7.6	13.2
Papaya	¼ cup raw	8.6	11.7
Pineapple	¼ cup raw	6.4	15.7
Taro	¼ cup cooked	8.0	12.6
Starfruit	¼ cup raw	13.5	7.5

# Assumptions - Estimated Annual FFVP Poundage Requirements (2014/2015)

- Approximately 30 weeks of participation from October to May
  - Average 2 days participation each week
- Assume: each fruit/vegetable offered maximum 3 times (goal is variety)
- Estimated demand for a single crop:
  - Maui
    - # of Students/Year (6,680) x 3 Servings = 20,040 Servings/Year of any single crop
  - Statewide
    - # of Students/Year (29,909) x 3 Servings = 89,727 Servings/Year of any single crop

# Selling to Schools in Hawai'i

## 1. Sell directly to Hawai'i Department of Education Public Schools

- a) Centralized buying through Oahu for all 255 non-charter public schools
- b) DOE Approved Vendor
  - a) GAP Certification; \$1 million liability insurance
  - b) Large volume requirements
- c) Formal procurement process; contracts

## 2. Sell directly to Charter Schools

- a) Often buy from aggregator
- b) May buy vended meals (e.g., Sodexo)
- c) Requires building relationship with school food manager and learning about menu cycles

## 3. Sell to Produce Aggregators

- a) Convenience
- b) Ability to prep/process

# Maui Produce Vendors

## **Watanabe Vegetable Processing LLC (HIDOE, FFVP, DoD Fresh\*)**

- Kula
- (808) 878-6747
- *\*DoD Fresh Vendor until September 30, 2015*

## **Kula Produce Co. Ltd./Armstrong Produce (HIDOE, FFVP)**

- Kahului
- (808) 871-6232
- [www.armstrongproduce.com](http://www.armstrongproduce.com)
- [panchoc@kulaproduce.com](mailto:panchoc@kulaproduce.com)

## **HFM Foodservice Corporation, Maui Distribution Center (HIDOE)**

- Wailuku
- (808) 877-2017
- [www.hfmfoodservice.com](http://www.hfmfoodservice.com)
- [purchasingadmin@hfmfoodservice.com](mailto:purchasingadmin@hfmfoodservice.com)

# Future of School Food Procurement

- Locally-sourced FFVP
- DOE school food procurement by smaller geographic units to support buying local
- Contracts between DOE and aggregators and farmers
- Farmer cooperatives

# School Food Farmer List

- Who is interested in selling into the FFVP and eventually to the DOE for school lunch?
- Receive information and updates
