

Hawai'i Meaningful Environmental Education for Teachers (HI-MEET)

A Yearlong Field Science Professional Development Program for Middle and High School Educators

Kickoff Training: July 25–27, 2017

Waimea Middle School, Hawai'i Island

Application Deadline: June 30, 2017

The Kohala Center's **Hawai'i Meaningful Environmental Education for Teachers** program is introducing **Huli 'Āina Kumu Wai** (Watershed Investigations), a field science curriculum aligned with NGSS and Common Core standards. The yearlong program supports Hawai'i's middle and high school teachers to offer field research opportunities to their students. The Kickoff Training will include instruction on Hawaiian cultural protocol, kilo observation skills, field sampling techniques, watershed education, and 14 lessons. The program also includes

- five (5) PDE3 credits
- ongoing support throughout the 2017–18 school year to conduct field science work with students, including transportation, logistics, and classroom presentations;
- a Data Analysis workshop in February 2018 on Hawai'i Island; and
- a Youth Symposium in April 2018 featuring student research presentations, keynote speaker, and scientific facility tour.
