

Hawai'i Island Vog Network Workshop for Educators

A collaboration of the Massachusetts Institute of Technology and The Kohala Center

Kicking off a yearlong professional development and STEM resources program for 6th- through 12th-grade teachers

**Saturday, September 8
8:30 a.m.–5 p.m.**

**Waimea Middle School, 67-1229 Māmalahoa Hwy
Keaoākea STEAM Learning Center, Room Z105**

Enhance your students' STEM engagement through this unique place- and project-based learning opportunity to measure the effects of vog on Hawai'i Island's air quality. Learn from MIT researchers how to set up and use air quality sensors, use data with your students, and teach to crosscutting NGSS standards through engagement with a real-world local environmental issue.

Apply for the program online at koha.la/hivn-app or contact Ilene Grossman at igrossman@kohalacenter.org or 808-887-6411.
